## Preparing Your Horse for Weather Changes? Equine Elixirs' Winning Winter Trifecta Can Help With That

Changes in weather can be stressful for your horse. Not only can falling temperatures result in gastric discomfort, they can introduce new allergens that create skin and respiratory ailments. With less turnout and fewer rides, your horse may have excess energy, and a more difficult time with muscle recovery.

Equine Elixirs' products are designed to complement one another. Read on to learn how Calmakazi, Immunox, and Ulceraser are the perfect trifecta for keeping your horse healthy and comfortable through the winter months.

### Calmakazi® Nervous System Support

Cooler weather often results in less turnout, more stall time, fewer consistent rides, and more pent up energy. Calmakazi's two-pronged approach to calming can help your horse transition successfully to a change in routine. Forage-based ingredients containing magnesium, tryptophan, and B vitamins help promote optimal nervous system function, while adaptogenic extracts help regulate cortisol and serotonin in response to external stressors.

### Immunox® Immunity & Antioxidant Support

In cool weather, muscles can tighten more quickly after working out. The antioxidants and anti-inflammatories in Immunox help reduce post-workout oxidative stress supporting muscle recovery and a healthy inflammatory response. Changes in weather also introduce allergens, which can lead to dry or itchy skin. Immunox's adaptogenic ingredients help moderate your horse's immune system response to these conditions.

### Ulceraser® Gastric Support

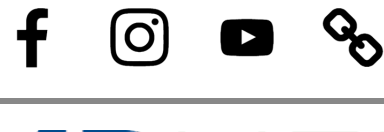

Ulceraser's forage-based blend provides daily support of the entire GI tract and is ideal for horses subject to the most common risk factors for digestive upset and ulcers, including changes in weather. For additional support, you can add one of our boosters to your Ulceraser order at checkout. Sea buckthorn extract is rich in anti-inflammatories and antioxidants, and also serves as a prebiotic for the hindgut, while aloe vera extract soothes mucosal membranes.

"The horses receiving Ulceraser are in a very good state of mind. Their conditioning, coats, and their overall look and performance is certainly at its peak. We're very happy with the condition of the horses who use Ulceraser, as well as the fact that the product is FEI- and USEF-safe."
